REMARKS

Claims 3, 5-10 and 15-32 are pending.

An Office interview held on 11 August 2005. An Interview Summary is enclosed.

The features of claims 21:

at least one rib formed to project from a peripheral surface of a first one of the bezel and the rear cover; and

at least one deformable coupling bearing a groove, extending from an inner surface of a different one of the bezel and the rear cover, oriented to embrace a correspond rib during said mating, wherein the rib is inserted in the groove;

and the feature of claim 24:

at least one stop extending from an inner surface of said bezel engaging said support while maintaining said bezel surrounding said screen

were discussed as compared to what is disclosed and illustrated in Nakamura et al. (US 5,768,095).

An exhibit using a cardboard cutout to resemble the components the Examiner is relying on in the patent to Nakamura et al. was used to emphasize the Applicant's position of traversal set forth in the Response filed 21 July 2005.

No agreement was reached and the Examiner was not persuaded to withdraw the rejections.

Respectfully submitted,

Robert E. Bushnell
